

Application Areas

- for wall, ceiling and floor
- objects, exhibitions and shop fitting
- for doors
- variable applications
- also able for small radii

Properties

- real-stone veneer, each leaf is unique
- rough split surface
- quick and easy assembly
- lightweight and flexible
- BST - according to German DIN 4102

Technical Properties (raw material)

general

front:	real sandstone – rough surface
back(*):	PP-backing fabric
Free from harmful substances:	sandstone-veneer is formaldehyde-free
fire behavior:	individual assessment
thickness (mm)	1,5 - 2,5
weight kg/m ² :	ca. 2,5 (depending on surfacetype)

(*) The back of the SV can be applied to many different substrate materials such as non-woven materials, HPL, particle board, PU-foam panels, HDF, MDF, natural fibre etc. depending on applications and use.
 Minimum 160 gr. craft papers or foil should be used for balancing –Follow the instructions of the mounting plate producer.

Beware of sparks developing during the mechanical processing with tools (sawing, routing, drilling). Appropriate safety measures should be taken at the workplace.

Surface protection

Depending on the application and purpose, there are different demands on the surface. So that the stone-veneer surface is optimal, let us know in advance of advice. We have worked with our partners to develop optimal solutions.

Processing note

If Stone-Veneer is used for tight radii, the area around the radius should be heated during processing.

Note

All test certificates, test reports and other technical information on request.

Our application of technical recommendations in written and spoken that we use to support the buyer / processor based on our experience, according to the current state of knowledge in science and practice, are not binding and shall not establish a legally valid contractual relationship, and no addition to obligations under the purchase contract.
